

CAMPUS SAFETY

A. W. Beattie Career Center has always considered the safety of students, staff and visitors as paramount to our campus. In this regard we have instituted a number of revisions based on best practice research. The Joint Operating Committee has authorized the administration through Policy #907 School Visitors and Administrator Guidelines to implement the following:

- 1) A visitor upon being granted access to the Career Center through the front secure entrance will be escorted to the main office.
2. The main office staff will request your driver's license that will be scanned through our Raptor security screening software. No one will be admitted beyond the school office without a proper clearance from the Raptor System. The administration will have the final authority over this action.
3. Public visitors to our Student Training Salon and Culinary Restaurant will be required to sign in upon entry at this entrance to maintain a daily accountability sheet.

A. W. Beattie Career Center appreciates your cooperation with these new procedures. These strategies are designed to protect everyone that attends a function on the campus at A. W. Beattie Career Center.

Respectfully,

Eric C. Heasley
Executive Director
